

WHAT IS AN NDIS PLAN MANAGER?

An NDIS registered plan manager takes on the responsibility of paying invoices issued to you by your support services and submits the claims to the NDIS portal.

What We Do

-  **Pay your providers for you**
We receive and check your invoices, then pay your providers on your behalf so you don't have to manage bills or paperwork.
-  **Help you use your NDIS funds correctly**
We make sure your supports are paid from the right budget categories and align with your NDIS plan.
-  **Track your budget and spending**
We provide regular statements so you can see how much funding you've used and what you have left.
-  **Support you when questions come up**
We're here to explain invoices, budgets, and NDIS processes in clear, easy-to-understand language.
-  **Give you choice and control**
You can use both registered and non-registered providers while we handle the financial side.
-  **Reduces stress and save time**
No chasing invoices, no claiming through the NDIS portal — we take care of it all.
